Micha~

I am requesting another continuance on the variance that I am seeking. Following my initial meeting with the P & Z board I realized I needed more technical information/assistance. I interviewed several general contractors/ engineers to help me. I selected one that I thought would be able to assist in a timely manner. He assured me on several occasions that he would deliver the revised roof and water relief plans. I discovered on November 1st that he did not deliver the plans to the building department. I have now selected another architect/engineer but it will take him time to get up to speed with the project.

Please advise me of upcoming meetings for this continuance request. I am however available for the Commissioner's meeting in November if they have questions for me.

Thank you,

Agnes P. Green
