Pinellas County presented the Stormwater Manual to the Local Planning Agency (LPA) on January 12, 2017 with the LPA recommending that Stormwater Manual be adopted.

On February 21, 2017 the Stormwater Manual was presented to the Board of County Commissioners (BCC). At this meeting the BCC adopted the Stormwater Manual with an effective date of April 1, 2017.

Based on this review having not been completed in 2015 or in 2016, the Town of Belleair feels that the following actions are appropriate in year 5 for consideration: The town's Public Works Department is will discuss the now completed manual with the Town Commission and should the Town Commission agree with the changes or and adjusted version of those changes, the town will consider adopting the changes prior to the end of Year 5's reporting period, adopt it by reference, or accept it if available countywide.

In year 5 of Cycle 3, the town of Belleair will report on the status of these proposed changes, adopt the land development code changes and/or stormwater ordinances, or accept the land development codes and/or stormwater ordinances if available countywide.

Sincerely,

Micah Maxwell
Town Manager
Town of Belleair, FL
