Good evening -

This e-mail is intended as a supplement to my earlier submission regarding the Belleair Country Club/RPD ground lease agenda item tabled during the previous Commission meeting.

I have since obtained and reviewed the full 2011 report by Dr. Robert Dean, as well as the 2012 follow-up from N.S. Nettles. The 2 reports are attached herein for inclusion in the record.

I originally hoped to participate in the discussion tonight but being short of help with our two young children this time around, that may not be possible.

As such, I would also like to add to the record Belleair's 2021 co-operative funding application to SWFWMD seeking funds to address the issue of erosion along the Bayview Bluffs as it seems to illustrate current staff interpretation of the provided engineer's data and the importance given to the stormwater and it's role in the state of the shoreline.

A close reading of the reports and the application raise a lot of questions and I hope more thought and discussion will be had. Also I second the objection to the issue of access in the event of a lease with the Club as it seems much more restrictive than many residents may otherwise realize.

Best, Whitney Wilson
