RE: 1574 Druid Road South, Belleair Florida 33756

Mrs. Dekars,

As an Architect of Record for the interior and exterior project at the house located at 1574 Druid Road South, Belleair Florida, I would like to remove the four fireplaces in the house because of damage on structure.

The existing fireplaces are masonry constructed from the ground level to the top of the roof, making difficult to do any structure repair around the fireplaces. The fireplace must be demolished from top to down in order to maintain the integrity of the structure inside the house

As such, there is no practical way to remove the non-functioning fireplaces while retaining the current two chimney stacks. Mr. and Mrs. Wolf respectfully request you consider this hardship with respect to any desires to retain the current chimneys. Please call me if you any additional information.

Sincerely

ALVARO A. RODRIGUEZ
ARCHITECT AR 95835
