Summary from Chief Doyle: It appears there is NOT a problem with speeding in this area. It does appear there has been an increase in traffic volume. Because this study is not scientific and the four different studies occurred at different times of year, it's difficult to make factual conclusions. The increase in traffic can be attributed to the time of year based on seasonal residents and an increase in residents during the winter season. It does appear there is more traffic that heads South on Golfview and East on Pineland heading to Mehlenbacher Road. Not sure why that is happening.
