Summary

To: Mayor Gary H. Katica & Commissioners  
From: JP Murphy, Town Manager  
Date: 9/17/2014

**Subject:**  
Continued Discussion and Update of Long-Term Water Supply

**Summary:**  
In preparation for an ultimate decision on provision of the Town’s long-term water supply I have been in contact with Pinellas County Utilities (PCU) to update the financial modeling of a system sale or transfer. PCU has submitted a list of requested items and documentation that should take our staff about 2 weeks to prepare. It is my expectation that we’ll be able to have final numbers from PCU in January.

In the interim, our communications staff is preparing more information for the website so residents can be informed on the decision. This information would include proposed rates, sample bills inclusive of all taxes as well as all of the other preliminary engineering report material already provided. A video of the presentation will be included as will the slides. Staff is requesting discussion on any further items the Commission or residents might need prior to action on the item. Please see the attachments provided under the related items tab.

**Previous Commission Action:** The Commission previously engaged an engineer for Preliminary Engineering for a Reverse Osmosis Plant. In addition, two public hearing were held, as well as multiple advisory board meetings

**Proposed Motion:** No motion, discussion only.
